*Allowable Subject Matter*

1. Claims 1-24 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior arts made available do not teach or fairly suggest, alone or in combination, a Coriolis mass flow sensor comprising a flow tube, a tube position sensor including a light source, a light pipe and a light detector and a drive device for vibrating the flow tube. The prior arts do not teach in combination a sensing member defining a sensing aperture situated between a light source and the light detector, wherein, the sensing member blocks a portion of the light received by the light detector such that the light entering the light detector has a predetermined shape. The prior arts made available do not teach alone or in combination a means for receiving light from the light source and converting the light from a Gaussian power distribution to a flat power distribution.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
